

Please note based on the findings of the various specialist studies, no other site sensitivities were presented.

The following specialist inputs were obtained:

- Agricultural - No sensitive areas
- Animal Species - No sensitive habitat/species
- Aquatic - No sensitive features
- Geotechnical/Geohydrological - No sensitive features
- Traffic Impact Assessment - No upgrades to road network necessary
- Heritage and Palaeontological - No sensitive features/areas
- Terrestrial Biodiversity and Plant Species Assessment - As presented on the map.

Additionally, several individuals of the Vulnerable species, *Hermannia lavandulifolia*, were found towards the northern boundary of the site.
