Dear Madam

CONTRACT No. C1038.02

SAFETY IMPROVEMENT N7 POTSDAM – MELKBOS – VAN SCHOORSDRIF I/C

SERVICES FOR OPERATIONAL PURPOSES

The development of the new weighbridge facility on the western side of the N7 between the Morningstar small holdings area and the Melkbos Interchange will require the following services:

Service	Comments
Stormwater	As per design. Stormwater run-off will be dissipated in the veld.
Potable water	A City of Cape Town connection is available south of the site at Morningstar.
Sewer	A conservancy tank with a private operator to empty it safely will be used.
Electricity	Electricity will be sourced from Eskom.
Solid Waste	Minor quantities of recyclable waste (paper) and domestic waste from the kitchenette serving six personnel will be generated. A maximum of four wheelie bins per week will be used which the municipality or a private contractor will empty.
Fibre communications	A local system for the weighbridge system will be connected to an external fibre operator.
Streetlights	Streetlights will be provided for the access roads, screener roads, weighbridge building and repacking area.

The relocated facility will require the same level of services as the existing facility which will be decommissioned after completion of the new facility. The facility will be relocated a short distance north of the existing facility.

Please contact me should any matter require further discussion.

Yours faithfully

Dawie Malan
