Looking north from near the south-western corner of the study area (this is south of the final weighbridge location).

View of dense stands of Port Jackson and Myrtle on site.

View west near the southern edge of the weighbridge site showing a powerline crossing the area. Alien trees have been removed beneath the powerline revealing the natural grass cover.

View eastwards into the stand of gum trees in the northern part of the site showing the great variety in age (as is evident from the different thicknesses of tree trunks). The N7 is visible behind the trees.

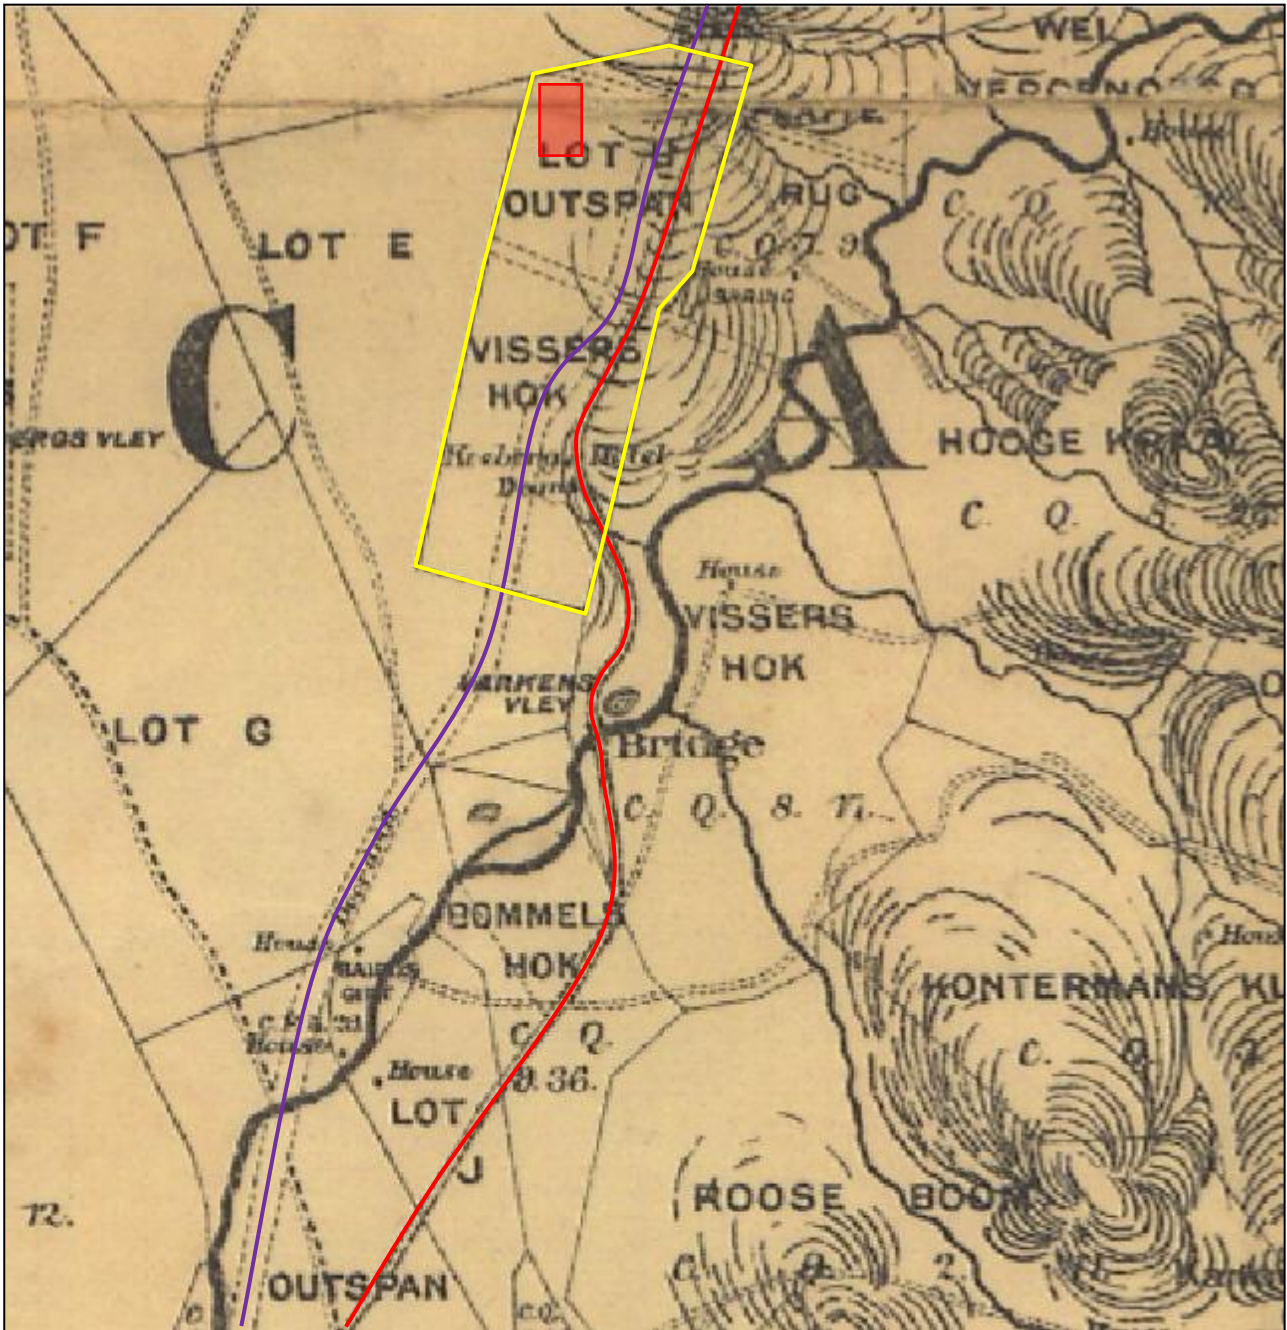

View westwards into the stand of gum trees in the northern part of the site showing the great variety in age (as is evident from the different thicknesses of tree trunks).

Looking south along the narrow strip of land on the east side of the N7 that would be used for part of the project.

View south along the N7 with the main project area behind the car in mid-picture. The weighbridge facility would be partly within the southern part of this clump of trees while the onramp would pass through the eastern edge of the trees adjacent to the road in this view.

Extract from the Cape Survey of approximately 1890-1900. The Vissershok Outspan (yellow polygon), Old Malmesbury Road (red line) and cattle thoroughfare (purple line) are indicated. The red shaded box is the approximate location of the study area.

1968 aerial photograph showing the Koeberg Hotel (a.k.a. Groendakkies) in the yellow oval, a large structure in the blue oval that is still part of the landfill facilities today and indicates the landfill to have already commenced operation. The study area is marked in red. Note the N7 showing a pale road slicing through the tree-lined Old Malmesbury Road to the east of the Koeberg Hotel.
